# Bendi B55AC-HL

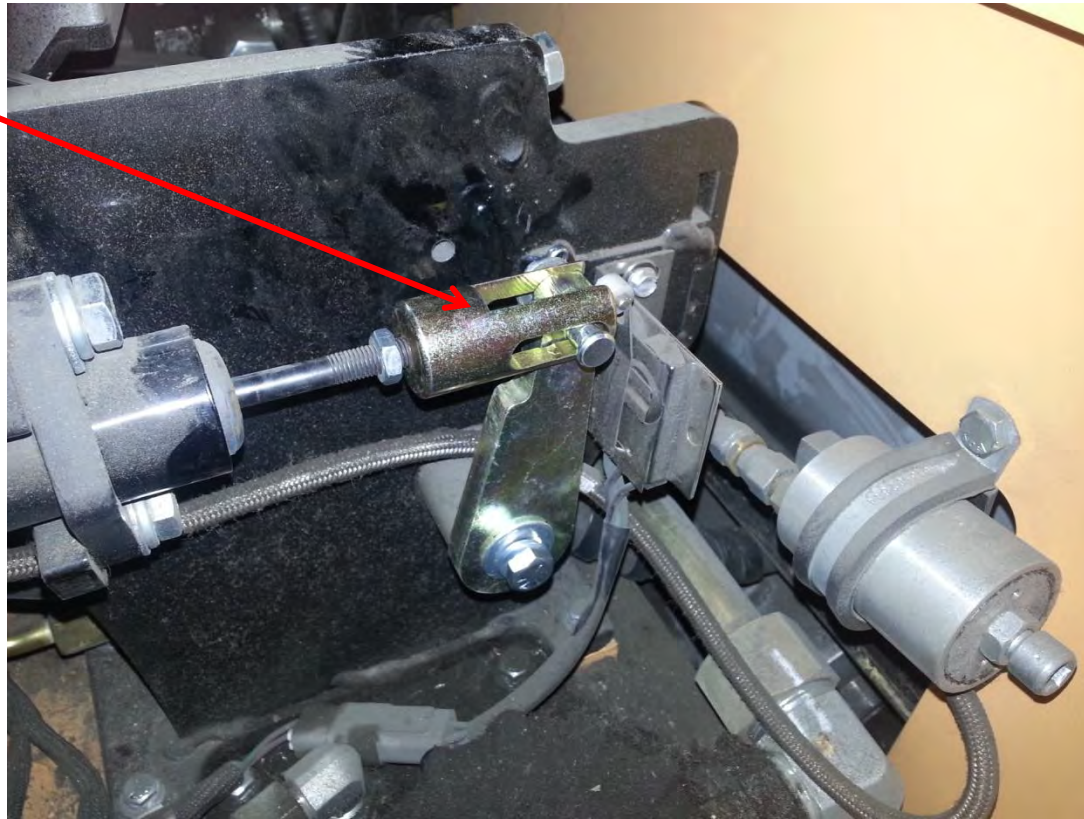

- Motor Compartment: AC Motors and Huge Brakes
- 7.5Kwh Cap. Ea. Drive, 17 Kwh Cap Pump Motor
- **No Motor Brushes to Service**

The Slotted Clevis on the Brake Master Cylinder Allows about 3” of free Brake Pedal Travel. As the Operator uses that free Pedal Travel, a Sensor Magnifies the Regenerative Braking Function of the Controller and Motors to Stop the Unit Electrically to Eliminate wear to the Brake Pads. Physical Brakes are used only in Accident Avoiding Stops.

**No Brake Repairs!!!**

Slotted Clevis
