

Rotary Actuator

TOTAL
WAREHOUSE

Unit Pictured is 360 Degree Rotation
Landoll Uses less Complex 180 Rotation
With Output Shaft at Top and Bottom

- 1 **Powerful, High Torque**
- 2 **Non-Drift, Zero Leakage**
- 3 **Backdrives in Overload Conditions, no Damage**
- 4 **Easy to Control and Hold Position**
- 5 **Simple Plug-and-Play**
- 6 **Extremely Durable**
- 7 **Moving Parts in Oil**

Dura-Steer on Standard B55AC with Tilting Mast

833-868-2500
totalwarehouse.com

Hydraulic Actuator does the Following:

- It provides far more Torque than Hydraulic Motor
- It gives Drift Free Steering Positioning
- There is no loss of Fluid through the Actuator
- It gives Rock Solid predicable Steering Motion
- It Eliminates “KickBack” through the Steering Wheel
- Unit will Absorb Shocks from Impacts without Damage
- Provides Very Long Life in Harsh Conditions – Oil Bath
- Unit Designed to Operate at 3000 PSI. We use 2000 PSI.
- It Eliminates Gears, Bearings, Shafts and Hydraulic Motor
- Landoll will Warranty for 5 years/ 6000 Hours
- The Power it Generates has made the Bendi B55AC Possible

When Beam Levels are Consistent, Marking the Mast for Height, Pinpoints Fork Entry Height, and Pallet Lift Off/Carry In Height, Even at 39 Feet.
