What if...

There was equipment that was so compact it could work anywhere a manual hand jack could go and also provided enough electric power for an entire days work?

It would change local delivery and basic material handling.

The same size as a manual pallet truck

Continuous duty cycle of over 4.5 hours on a single charge

3" Lowered height for easy pallet entry and exit

Revolutionary permanent magnet drive requires no regular maintenance

Integral AGM batteries outlast, outperform and support charging anytime

Go from truck to store indoor or outdoor – Lift gate, dock, retail or warehouse

Rethink your operation and reduce operator strain while improving productivity

The Big Joe E30 Electric Pallet Jack
