

GREEN6 3-PHASE BATTERY CHARGER

GREEN SERIES INDUSTRIAL CHARGERS

The **GREEN6** power module based charger is a high-frequency, fully automatic charger for use with lead-acid and lithium batteries. The **GREEN6** is multi-voltage configurable and offers high-energy efficiency that reduces operating costs while the power module system eliminates downtime to increase productivity.

FEATURES & BENEFITS:

- 208V-480V Input Across All Phases
- Suitable for Flooded, AGM, Gel Traction, & Lithium Batteries
- Standard CC/CV/Stop Profile or CAN Bus Option for Lithium Batteries Upon Request
- Multi-Voltage/Multi-Current Configurable via Front Panel Display or USB A/B Port with PC/HF View Software
- Optional Integrated Data Logger with RTC (Real-Time Clock) Upon Request
- Reverse Polarity Protection
- Soft Start Charging Cycle
- cUL & UL/CEC Approved

Modular Power

wall mount support

Input Voltage: 220 or 480 VAC • Weight: 78 lbs

Model	Battery Voltage	Charging Current	Input Voltage	Input Current
GREEN6 24-80	24	80	480	4.3
GREEN6 24-100	24	100	480	5.4
GREEN6 24-120	24	120	480	6.4
GREEN6 24-150	24	150	480	8
GREEN6 36-80	36	80	480	6.4
GREEN6 36-100	36	100	480	8
GREEN6 36-120	36	120	480	9.6
GREEN6 36-150	36	150	480	12
GREEN6 48-50	48	50	480	5.4
GREEN6 48-60	48	60	480	6.4
GREEN6 48-80	48	80	480	8.6
GREEN6 48-100	48	100	480	10.7
GREEN6 48-120	48	120	480	12.9
GREEN6 48-130	48	130	480	13.9
GREEN6 48-150	48	150	480	16.1

- 72 & 80 Volt Chargers Available
- 200/400 VAC Available Upon Request
- Specialized Charging Curves Available

Dimensions: 14.45" x 26.65" x 8.78" L x W x H • Protection Grade: IP20
