

LPG COUNTERBALANCED TRUCKS

CAPACITY: 5,000 – 6,500 lbs.

HT25T - HT32T

SERIES 1219

Safety

This line of trucks is designed for the demanding conditions of the Class 5 market. A low-mounted propane tank and dashboard, combined with a clearview mast (peripheral view) increase all-around visibility. This, together with low noise level and simple operation allow operators to stay alert and maintain unparalleled awareness of their surroundings.

Performance

With its impressive performance the truck still maintains low fuel consumption and low exhaust emissions. Advanced engine technology combined with the durable drive line enables the operator to use the trucks capability to maximize productivity. The ergonomic layout of all hydraulic functions allow for a high level of precision fingertip control and working performance.

Comfort

Climb on board relaxed, finish the shift relaxed. This truck is designed to the most advanced ergonomic standards. A spacious cab interior with accessibility from both sides of the truck, deck-mounted hydraulic controls, suspension seat, and functional positioning of easy-actuation controls make for a low-stress working environment.

Reliability/Durability

This machine withstands the most brutal conditions in severe applications thanks to our time-tested engineering, design and manufacturing expertise. Its solid components are designed to operate in adverse conditions and can handle intense utilization with minimum care.

Productivity

The use of high-quality parts and assemblies allow extended maintenance intervals. At 500 hours, this is among the best in the industry. Confidence in the quality of the machine also allows us to offer an unmatched, standard 2-year or 4000-hour warranty.

FEATURES

Linde Torque Converter Truck

- > Robust
- > Responsive
- > Low maintenance

Rugged Drive Line

- > Massive differential
- > High-torque transmission
- > Wet disc brakes

Linde Clearview Mast

- > Best peripheral view
- > Least obstructive hose routing
- > Bulkhead hose connection

Engine

- > 500-hour maintenance interval
- > Fuel injected
- > 2.5 liter, high-torque engine

Truck Control

- > Two pedal system, inching and brake
- > Foot-operated parking brake
- > Easy-read display
- > Responsive accelerator pedal

Linde Hydraulic System

- > Deck-mounted control handles
- > Short linkage
- > High oil volume

Linde Operator Compartment

- > Ample space
- > On/Off both sides
- > Excellent rearward visibility
- > Standard full suspension seat
