WAREHOUSE

- The Series 5215 utilizes 100% AC Motor Technology along with the latest controls allows the operator to smoothly operate the truck
- Operators benefit from sealed critical harness connections and solid-state components
- Linde's well known ergonomic controls provide a sure grip increasing operator productivity and confidence
- A one-piece low profile design cover requires no tools and provides better visibility and full access to key components
- CAN-bus design and diagnostics can be controlled through a single point plug and fault codes can be easily displayed

STANDARD & OPTIONAL EQUIPMENT

STANDARD

- Heavy duty pallet clamp opening range 1" to 5.4"
- 42" x 27" operator platform
- 42" x 1.5" x 4" standard tapered forks
- 13.5" x 5.3" polyurethane drive tire
- 5" x 4" articulating tandem load wheels
- 38.7" x 14.6" x 32" height battery compartment
- 24V electrical system
- Standard construction
- 42" outside dimension (base width basearms)
- UL classification type "E"
- Key switch start
- Steering returns to center upon start
- Curve control
- Powered lowering
- Stationary multi-function control handle
- Operator sensor in handle
- Proportional lift with regenerative lowering
- Large surface electrical park brake / automatically engaged / foot release
- Wide opening pallet clamp automatically engaged foot control
- High-level operation restricted speed and steer angle < 10°
- AC traction / hoist / steering
- Single hydraulic pump and motor
- CAN bus communications
- Electric power steering with auto-center at startup
- Auto deceleration with regenerative braking
- LCD multi-function display with back lighting
- Hour meters: truck, traction, and hoist pump
- Battery discharge indicator with lift interrupt
- Steer drive unit wheel angle indicator
- Truck speed in mph or km/h
- LED indicators with symbols
- SB 350 "Red" battery conductor
- Programmable travel speeds
- Slack chain indicators
- Cantilevered overhead guard
- Low step height
- Protective wire mesh mast guard
- Hoop-style stationary platform gates
- Battery power disconnect button
- Operator storage compartment with removable bins
- Full body harness and retractable tether
- Electric horn
- Static strap
- Fixed clipboard
- Beverage holder
- Battery rollers
- Chassis-mounted flashing beacon
- Operating manual - English

OPTIONAL

- 36V electrical system
- UL classification "EE"
- Pin code / toggle switch
- Environmental construction
 - Cooler freezer conditioning -26°F - 110°F
 - Corrosion
 - Food grade
- Safety glass shield
- Retractable side gates with traction cutout
- 4" vertical adjustable (Electric) operator console / work station
- Various mast options available
- Fork option lengths available
- Lift limit
- Lift limit with push-button override
- Various drive tire options
- Operator platform widths 42", 48", 54", 60"
- Wire guidance
- Rail guidance
- Various light / convenience packages
 - Cabin light
 - Two lateral lights
 - BlueSpot™ activated forward
 - BlueSpot™ activated reverse
 - One light to shine on load
- DC to DC converter - 25 amps / 400 watts at 12 volts
- Motion alarm forward and reverse
- Motion alarm when operation timed out
- Parts manual
- Polycarbonate mast protection
- Various battery connector colors

Control Handle

Linde Series 5215 Five Features

- **Operator Comfort:** Large operator compartment, foot room, and brake area with a premium floor mat to ensure enough space to comfortably change foot positioning throughout the day.
- **Open Access to Components:** Full access to key components is achieved without tools and directly in front of technician.
- **Curve Control:** Linde curve control automatically reduces driving speed depending on steering angle, ensuring an extra level of safety.
- **Unique Clamp Design:** Automatically clamps and centers pallets with any stringer, ranging from 1" to 5", eliminating the need for standardization of pallets or the use of workarounds.
- **Control Handle:** The multi-function control handle is stationary, allowing a solid 4-point stance position in the operator compartment with the use of a thumb tiller to travel. This handle has eliminated any wrist movements while keeping the operator feeling attached to the truck at all times.

ANSI: Standard truck meets all applicable mandatory requirements of ANSI/ITSDF B56.1 standards for powered industrial trucks.
NOTE: Performance data may vary due to motor and system efficiency tolerances. The performance depicted represents nominal values obtained under typical operating conditions. Metric dimensions are in millimeters unless otherwise specified. All metric dimensions are not direct equivalents due to rounding data.
