Objective

The purpose of this comprehensive course is to provide recommendations for pedestrians working in a facility using powered industrial equipment.

Prerequisite

Employees who work around material handling equipment but do not operate that equipment.

Agenda

- ◆ On-site, instructor-led lecture and facility safety awareness tour
- ◆ Classification types
- ◆ Pedestrian Supervision
- ◆ Learning about unique forklift operating characteristics
- ◆ Understanding reasons for separation of pedestrians and forklifts
- ◆ Recognizing importance of eye contact and communication
- ◆ Cautioning to always maintain alert
- ◆ How to maintain a safe distance
- ◆ Familiarization with facility's safety practices and rules

Special Instructions

This course is designed to help increase lift truck awareness among employees who do not operate forklifts but do work in facilities with the material handling equipment. This course provides recommended safety practices.

Partnership

Our Pedestrian Safety course shares proper safety practices when walking around a facility with powered industrial trucks, even if they are turned off. This course does not cover OSHA forklift operator safety certification.
