

CHARACTERISTICS

Ergonomics

- Ergonomic and intuitive operating concept maximizes driver comfort
- Neoprene bearings between chassis, mast and tilt cylinder reduce negative effect of impact and vibrations
- Large variety of available seats, assist in preventing operator fatigue
- 3.5" color graphic display provides easy to read truck status

Handling

- Linde Load Control and dual pedal travel control ensure precise operation of all movements
- Programmable "smart" buttons allow quick access to frequently used functions
- Overhead tilt cylinders enhance torsional stability and allow superior residual capacity at high lift heights
- Fuel consumption is minimized through low average engine RPM – effectively reducing operating cost

Safety

- Shaped overhead guard legs and mast profiles, together with unique hose routing deliver outstanding all-around visibility
- Optional armored glass overhead guard top will allow unsurpassed load visibility at elevated heights
- Low center of gravity and high mounted (pivoting) steer axle enhance stability while cornering
- Linde assist systems support the operator in avoiding tip over situations

Service

- Robust construction with low wear or even maintenance free components ensure high truck uptime
- Truck "health status" monitoring assist in effective fleet management programs
- Linde Engine Protection System provides additional protection against engine damage
- Extra-large service access openings facilitate easy component access

linde_spec_1202_12pg_2020707

ANSI Standard truck meets all applicable mandatory requirements of ANSI/ISO 868, 1 standards for powered industrial trucks. NOTE: All values are in metric units unless otherwise specified. All metric dimensions are in millimeters unless otherwise specified. The descriptions and specifications included on this data sheet were in effect at the time of printing. KION North America Corporation reserves the right to make improvements and changes in specification or design without incurring obligation. Please check with your authorized Linde dealer for information on possible updates or revisions.

Linde Material Handling

Linde

INTERNAL COMBUSTION ENGINE COUNTERBALANCE H20 - H35

4,500 - 7,000 lb. Capacity

Series 1202

- Hydrostatic drive, dual pedal control and Linde Load Control enable efficient load handling
- Robust construction and maintenance-free components guarantee high truck availability
- Slant mast profiles, narrow A-pillar, lowered front plate and see-through roof ensure outstanding visibility
- Wireless truck data transmission assists with fleet management programs
- The low center of gravity and intelligent assistance systems reduce the risk of tipping and loading accidents

STANDARD & OPTIONAL EQUIPMENT

STANDARD

- Floating cab
- Tilttable steering column
- Full suspension, weight adjustable seat
- 3.5” color display
- Linde Hydrostatic Drive
- Deutz Diesel Engine or Deutz LP Engine
- LEPS, Linde Engine Protection System
- Variable displacement hydraulic pump
- Solid pneumatic tires (SE)
- High mounted tilt cylinders
- Slanted mast rails
- Tilt cylinders with cushioned end stops
- 6-roller carriages
- Dual pedal travel control
- Automatic parking brake (when engine is off)
- Standard tilt range 5° forward/5° backward
- 89.6” standard OHG with H20/600 and H25
- 91.4” standard OHG with H25/600, H30 and H35
- Two front work lights (LED or halogen)
- 48 month / 8,000 hour warranty

OPTIONAL

- Large variety of tires
- Anti load-spray mud flaps
- Several travel speed reductions
- Tilt angle pre-selection
- Fork above ground stop
- Simple, dual, and triplex masts
- 8-roller carriages
- Integrated side shifter
- Integrated sideshifting fork positioner
- Load backrest
- Lowered overhead guard
- Fully enclosed operator cabin with standard top glass
- Fully enclosed operator cabin with armored top glass
- Configurable half cab
- Large variety of upgraded seats; heated, cloth, and ventilated
- Swiveling seats, 10 & 17 degrees
- Seat belt interlock
- Air-conditioned or heated cabin
- Internal and external mirrors
- Main hydraulic valve with up to five functions
- Auxiliary function hydraulic hose reeving
- Halogen or LED road light packages
- Front and rear LED stripe lights
- Linde BlueSpot™
- Load weight indicator
- Back-up alarm
- Flashing beacon
- High exhaust routing
- High mounted air intake
- Single pedal travel control

FEATURES

Linde Series 1202 Five Features

Lowest Maintenance Cost:

- 1000 hour periodic maintenance
- No service brake maintenance or repair
- Neoprene tilt cylinder and axle bearings

Highest Residual Capacity:

- High rigidity mast rails
- Low center of gravity
- Best weight distribution
- Overhead tilt cylinders

Superior Ergonomic Design:

- Low noise level
- Large foot room
- Standard armrest with fingertip controls
- Standard fully adjustable suspension seat

Energy Efficient:

- Low average engine RPM
- Engine RPM is automatic, and demand controlled
- Hydrostatic drive system with axial piston technology

High Performance:

- Hydrostatic drive system
- Standard dual pedal travel control
- Automatic acceleration and deceleration

DESIGNED FOR EFFICIENCY

Thanks to the optimized design of the chassis, cabin and mast, drivers now have an even better view in all directions. The particularly narrow A-pillar gives the driver good visibility of the load and their surroundings. The driving path is also easier to see thanks to the slim mast profiles. The lowered front plate also improves the visibility of the forks and the load. The Linde Series 1202 is designed for efficiency, with the driver in mind.

- Armrest controls, within an ergonomic workstation, enable precise operation
- Nested mast rail offers unmatched all-around visibility, increasing driver protection
- Low noise level promotes an exceptional driving experience
- A full suspension seat decreases operator fatigue
- An optional panoramic armored glass roof guarantees the best view upwards

BUILT FOR ALL CONDITIONS

The Linde Series 1202 represents everything that Linde forklift trucks stand for. It is extremely powerful, user-friendly, robust and versatile with the ability to operate in countless applications.

- A fully enclosed belly pan prevents unwanted dirt and debris from entering the engine area, increasing the ability for operation in recycling and paper applications.
- Automatic acceleration and deceleration promotes infinite speed control, delivering smoother transitions with speed.
- Overhead tilt cylinders ensure the operator is working effectively and safely, increasing residual capacity.
- The high periphery view mast aides in the prevention of loading accidents, as well as ensuring outstanding visibility in all directions.

This vehicle offers **durability**, **safety** and **productivity**, resulting in the best solution for your material flow requirements, both now and in the future.
