STAND UP ELECTRIC FORKLIFTS

LINDE 5195 SERIES

STAND UP SINGLE & DOUBLE REACH FORKLIFT

The Linde 5195 single and double deep reach truck boosts storage efficiency with two-deep pallet access, ideal for high-rack warehouses. Its smart controls, ergonomic features, and energy-recycling lowering system enhance operator comfort and maximize uptime.

SPECIFICATIONS Capacity: 3,500- 4,500 lbs Lift Height: From 15- 42ft Aisle Width: 9ft or more

LEASE FROM:
\$699
per month

- **High-visibility system**
Mast and camera system give operators clear sightlines for precise load handling.
- **Durable construction**
Ensure stability and long-term reliability in demanding warehouse environments.

MAXIMIZE EVERY SQFT
Maximize warehouse space and cut long-term storage costs with double-deep reach equipment—store pallets two deep to boost capacity by up to 30% without expanding your footprint.

LINDE 1346 SERIES

ELECTRIC STAND UP COUNTERBALANCE FORKLIFT

Ideal for docks, the Linde 1346 electric counterbalance forklift tackles tough tasks with ease. The low-height suspended platform, small footprint and robust frame are purposefully designed for challenging applications. The most spacious operator compartment is combined with adjustable ergonomics components for max. versatility.

SPECIFICATIONS: Capacity: 3,000-4,000 lbs Lift Height: From 15-30ft Aisle Width: 10 ft or more

LEASE FROM:
\$646
per month

- **Durable construction**
Engineered for lasting durability in heavy-use environments.
- **Ergonomic Compartment**
Designed for operator comfort and safety so your team stays productive.

SIT DOWN ELECTRIC FORKLIFTS

LINDE 346 SERIES

3W/4W SIT DOWN COUNTERBALANCE FORKLIFT

The 346 Series combines smart technology and ergonomic design to enhance comfort, reduce maintenance, and extend battery life. Its tight turning radius makes it ideal for busy warehouse aisles, while reliable AC drive and hydraulic motors deliver consistent power throughout every shift.

SPECIFICATIONS: Capacity: 3,500-4,000 Lift Height: 10-30ft Aisle Width: 9ft or more

LEASE FROM:
\$569
per month

- **High Value Solution**
A cost-effective solution built for long run times and low maintenance.
- **14hr Run Time**
Delivers all-day power to handle demanding shifts without recharging.

ERGONOMIC BUILD

TIGHTEST TURNING RADIUS

Built for precision, the Linde 346 series features the tightest turning radius of any sit-down truck. This means sharper maneuvers in narrow aisles, optimized warehouse layout, and enhanced overall productivity.

LINDE 1347 SERIES

MID-CAPACITY SIT DOWN COUNTERBALANCE FORKLIFT

Engineered for rugged performance, the Linde 1347 is a dependable workhorse suited for a wide range of applications. Its compact dual AC motor drive axle, paired with Linde Load Control, ensures precise handling, stability, and efficient operation — making it a value solution for demanding, multi-shift warehouses.

SPECIFICATIONS: Capacity: 5,000- 6,500 Lift Height: 10-24ft Aisle Width: 10 ft or more

LEASE FROM:
\$599
per month

- **Durable construction**
Engineered for lasting durability in heavy-use environments.
- **Ergonomic Compartment**
Designed for operator comfort and safety so your team stays productive.

BEST-IN CLASS PICKING SOLUTION

LINDE 1355 ORDER PICKER

The Linde 1355 V15 ensures maximum stability and safety with its secure stance and ergonomic controls. Built for narrow aisles, it boosts productivity and maximizes warehouse space.

SPECIFICATIONS

Picking Height: Up to 40 ft **Capacity:** 3,000 lbs **Aisle Width:** 5ft or more

- **Adaptive Speed Control**
Set speed limits for specific areas such as slower speeds when entering aisles or curving

- **Enhanced Safety and Stability**
Delivers precise control in tight spaces and during product loading or unloading.

Stable order pickers are critical not only for operator safety but also for dynamic, efficient picking, allowing operators to stay focused and productive, even when working at height.

LINDE PRECISE WIRE GUIDANCE

With Linde's Smart Guide system, the 1355 maintains flawless alignment in very narrow or dense aisles, enhancing safety and allowing operators to maximize picking speed and efficiency.

- **Ergonomic, Easy to Use Controls**
Designed to run smoothly in high-demand, fast-paced warehouse environments.

- **Lithium Opportunity Charging**
Opportunity charging cuts downtime; plug in during breaks and keep the truck running shift after shift

- **Cart and Platform Compatibility**
Easily connects to picking carts or furniture platforms for maximum versatility.

VNA TURRET TRUCK

LINDE KMOD 5231 TURRET FORKLIFT

The Linde VNA 5231 turret forklift enables extremely efficiency organization of workflows, greater throughput, and high pallet storage density. This specialized VNA truck is capable of simultaneous horizontal travel and vertical lift, giving it a substantial advantage over other truck types.

The Linde man-up combi K range.

The Linde K range of man-up trucks is perfect for all VNA warehouse applications. These modular combi trucks are designed for handling full pallets and order picking at light heights of up to 50 feet.

SIT DOWN PROPANE FORKLIFTS

Ergonomics

- Ergonomic and intuitive operating concept maximizes drive comfort
- Neoprene bearings between chassis, mast and tilt cylinder reduce negative effect of impact and vibrations
- Large variety of available seats, assist in preventing operator fatigue
- 3.5" color graphic display provides easy to read truck status

Handling

- Linde Load Control and dual pedal travel control ensure precise operation of all movements
- Programmable "smart" buttons allow quick access to frequently used functions
- Overhead tilt cylinders enhance torsional stability and allow superior residual capacity at high lift heights
- Fuel consumption is minimized through low average engine RPM - effectively reducing operating cost

A SENSITIVE POWERHOUSE

Linde was the first company to use a hydrostatic drive for IC trucks. This features a pump which is powered by the internal combustion engine. This pump transmits power in the form of oil pressure via a closed circuit linked to the two hydraulic engines in the drive axle. The driver controls the volume and direction of the oil flow—and therefore the speed and direction of the truck—using two pedals: the Linde dual pedal control.

The truck's direction can be changed simply by switching pedals. When doing so, the closed oil circuit brakes the truck, meaning the braking system is just as superfluous as a clutch and transmission. This way, Linde's hydrostatic drive is able to work continuously, entirely uniformly, and smoothly. This innovative form of transmission is what gives Linde's internal combustion trucks their dexterity and efficiency.

HIGH CAPACITY FORKLIFTS RANGE OF 15,000 - 40,000 lbs CAPACITY

WHY BUY WHEN YOU CAN RENT?

TOTAL WAREHOUSE has a massive rental fleet ready to be delivered to your business at a moment's notice. We offer daily, weekly, and monthly rental rates that allow you to keep your operation running at the bare minimum cost. Our customers love our rental services because they know they can count on a quality, clean unit delivered to their location quickly, without experiencing any downtime.

INDUSTRY RACK PLANNED MAINTENANCE SERVICE 10 POINT CHECKLIST

Our Installers are highly trained on the products we supply use and will provide the upmost customer service , to assure your that you receive consistant and reliable install at an economical cost. 10 necessary items we review for maintenance of storage racks:

- Structural Integrity of the Frames/Uprights (support the majority of the racks)
- Beams are not damaged from Forklifts (no dents, dinks, rust)
- Column Guards/Frame Guards are not damaged from Machinery
- Footplate and Anchors are not damaged and are stable - with the right amount of anchors per plate
- Diagonal Bracing have not snapped or twisted
- Building Columns near Racks are not hitting the Storage Racks, damaging rack components
- Row Guards/Pallet Stops are not crushed by Commodities stored within
- Beam Connectors/Pins are still stable - check back of the column of the upright to make sure it is still clipped on
- Rust Spots are a huge sign of strength loss in a material, may be unreparable if kept unchecked
- Homemade Repairs may damage the racks even worse, resulting in a dangerous work environment; It's more in likely would be a City Violation as well.

PALLET RACK STORAGE SYSTEMS

As the cost of building space continues to soar, the only answer is to ELEVATE! The proper layout and design of a pallet rack storage system is crucial to obtain your ultimate storage goals. We specialize in requirements ranging from a few sections to a complete turnkey hi-density storage system. Call the TW sales staff and receive valuable advice and a free layout and analysis to improve your storage space!

Expanding Or Relocating?

TOTAL WAREHOUSE can help you maximize your storage space at your current or new facility and do a complete rack analysis using your current, all new or a mix to help your move go smoothly. Our install team can do a complete teardowns, shipping and re-install of current racks and or we offer great trade-in values on your current used rack.

RACKING PROJECT PROCESS

1

YOU CALL

The first step in the journey towards your incredible new warehouse storage system is simply contacting TOTAL WAREHOUSE.

2

WE ENGINEER

No warehouse engineering project is too large or too small for TOTAL WAREHOUSE.

3

WE DELIVER

We have a massive stock of all uprights, beams, and decking, so your project is never stalled waiting on shipments.

4

WE INSTALL

Our installation teams are punctual, professional and well equipped to handle any potential obstacles that may happen during your project.

WELDED WIRE DECKING

Welded Wire Decking makes inventory easier to see and handle, reduces fire hazard, maximizes, and simplifies product handling. Inventory stays clean, neat and organized. Here's strength with economy, easy to install and no maintenance.

- Starting at \$15.00 each
- Large Variety of Sizes

DEMATIC

SMART MOBILITY FOR SMARTER WAREHOUSING

With decades of automation expertise and global support infrastructure, Dematic and Total Warehouse delivers more than just AGVs—we deliver intelligent mobility solutions that evolve with your business.

- Efficient Pallet transport**
 Moves pallets quickly and safely, keeping products flowing.

- Raw Material Handling**
 Deliver raw materials on time, right where production needs them.

- Production Line Replenishment**
 Tugger AGVs restock lines automatically, cutting downtime.

- Finished Goods Handling**
 AGVs move finished goods to storage or shipping with precision.

COUNTER BALANCE AGV

AUTONOMOUS MOBILE ROBOTS

BIN TO PICKER

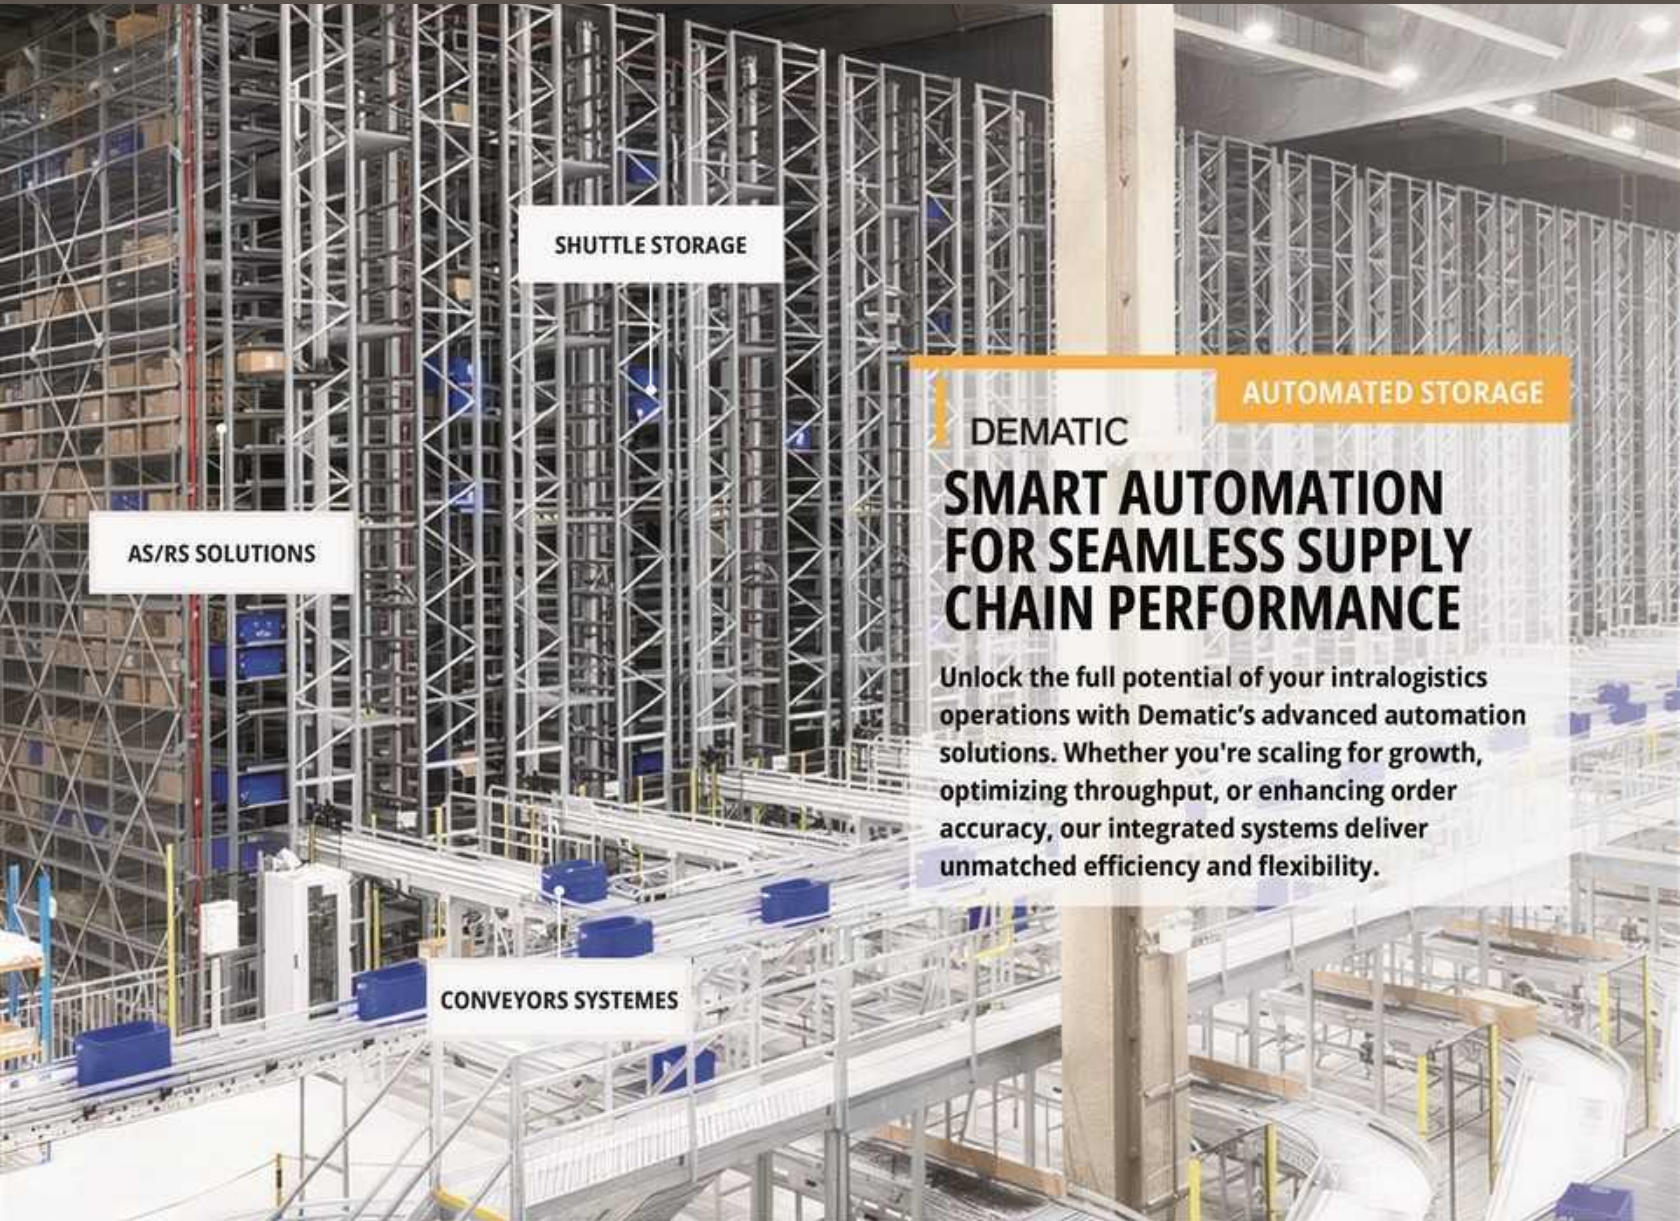

GOODS TO PERSON

MOVE MORE PALLETS FASTER

Pallet Transport AMRs take the heavy lifting out of moving pallets. Instead of relying on forklifts or manual labor, these autonomous mobile robots safely and efficiently move pallets through your warehouse, distribution center, or factory.

By streamlining material flow, they help reduce risks, cut downtime, and boost overall productivity—so your team can stay focused on higher-value tasks.

CONVEYOR SYSTEMS

SHUTTLE STORAGE

AUTOSTORE

From simple transport to complex sortation, our modular systems adapt to your facility's layout and operational needs. It provides:

- Scalable design for evolving business
- High-speed throughput with intelligent routing
- Real-time visibility through integrated software

Dematic shuttle systems offer dynamic, multi-level storage ideal for fast-moving inventory. Designed for precision and speed, benefits include:

- Space optimization with dense vertical storage
- Rapid access to goods with minimal wait times
- Flexible SKU management across multiple zones

AutoStore is the ultimate solution for goods-to-person automation in tight spaces. With robotic bins and grid-based architecture, it provides:

- 24/7 operation with minimal maintenance
- 60% space savings compared to traditional racks
- Energy-efficient and low total cost of ownership

BATTERIES & CHARGERS

LINDE KBS LITHIUM BATTERIES

Lithium batteries and chargers are the optimal solution for the energy efficiency and durability requirements of today's material handling industry. Combining Linde lithium ion battery and Linde charger can increase energy yield by 30% compared to lead-acid batteries. With their robust performance, these forklift batteries ensure extended operational hours and fast recharging to enhance productivity in operations.

- NO BATTERY SWAPPING
- NO BATTERY WATERING
- LOW OPERATING COST
- 80% LONGER RUN TIME
- 70% REDUCED CHARGE TIME
- DOUBLE WARRANTY

MAXIMIZE WITH LINDE LI-ION CHARGING

Combining the **Linde Li-ION battery** and Linde charger increases energy yield by 30% compared to lead-acid batteries. Additionally, this powerful solution maximizes vehicle availability and makes operations more economical, efficient, safe, and sustainable.

Why choose Lithium-ION?

Opportunity Charging

Compared to lead acid battery, Lithium-ION does not require battery change, increasing working efficiency by 15%

High Speed Charging

Lithium-ION's charging efficiency is 5x faster than lead acid battery

Higher Energy Efficiency

Lithium-ION's energy efficiency is 30% higher than lead acid battery

Low TCO

In the 10-year life cycle, the cost of Lithium-ION's battery is 40% lower than lead acid battery

TRIATHLON[®]

INTELLIGENT BATTERIES

Triathlon[®] Lithium-Ion and Lead-Acid batteries are designed for multiple industrial uses for extended operational hours and fast recharging to enhance productivity in operations. These top-quality batteries for motive power applications are the optimal solution for the energy efficiency and durability requirements of today's material handling industry.

- HIGHER AMP-HOUR CAPACITY
- DECREASED WATERING
- EXTENDED RUN TIMES
- DECREASED MAINTENANCE

EnerSys
Power/Fuel Solutions™

LEAD-ACID BATTERIES

Featuring unique square tube technology, Ironclad® batteries have been leading the industry for over a century with their Traditional Flooded Lead Acid, Thin Plate Pure Lead, and Lithium-Ion technology. Since 1910, these batteries have provided unmatched performance, helping thousands of operations optimize vehicle fleet efficiency.

- LONGER RUN TIMES & CYCLE LIFE
- FAST DRIVE AND LIFT SPEED
- DECREASED WATERING
- UP TO 5-YEAR +1 WARRANTY

HAWKER®
BUILT TO PERFORM

REVOLUTIONIZE ENERGY SOLUTIONS

Leading industrial battery brand known for manufacturing a wide range of efficient lead-acid batteries that effectively control and reduce motive power operating costs. Our batteries feature innovative technologies such as dense paste, battery sleeves, and the industry's first acid recirculation system, ensuring longevity and cost-effectiveness.

LESS WATERING

Add water just four to six times per year vs. every week

AMP HOURS

Industry-leading amp-hour capacity rating

RUN TIMES

Extended run times allow trucks to last longer into the shift

LCFS Low Carbon Fuel Standard

THE PATH TO DECARBONIZATION

The Low Carbon Fuel Standard is designed to decrease the carbon intensity of California's transportation fuel pool and provide an increasing range of low-carbon and renewable alternatives, which reduce petroleum dependency and achieve air quality benefits.

Linde Connect FLEET MANAGEMENT

Portfolio

How Linde Connect products interact to make your day-to-day work easier.

Infrastructure

Whether Bluetooth, Wi-Fi or mobile broadband technology, all the options are available for your fleet data

Training

One on one training with Total Warehouse focusing on a variety of subjects.

Reports and Analysis

Make your fleet as efficient as possible. Over 15 different interactive reports are available for that purpose.

Organized

Linde Connect displays information broken down by company organization and assigns the drivers accordingly.

Planned

Reminds you about regular fleet maintenance and driver training, and assists you in planning work rotas to accommodate these measures.

Hardware

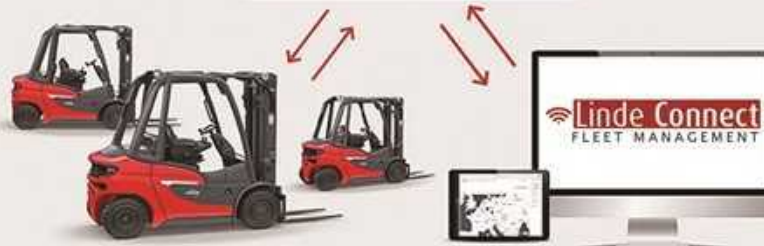

Our hardware will reliably communicate with a vehicle, collate information, and transmit it wirelessly.

Functional

Our connect portfolio is modular in design, allowing you to choose precisely the functions for your fleet that you actually need.

CLOUD INTEGRATED

Software

Plan fleet usage, manage drivers' details, monitor and manage vehicles, analyze data, and generate reports: thanks to our programs, you can handle all of this effortlessly from your desk.

Transparent

Linde Connect presents you with the key vehicle data, clearly displayed on a customized dashboard - or in the form of detailed analyses and reports relating to individual vehicles, drivers, or divisions.

App

The connect pre-op check app simplifies vehicle checks and simultaneously provides access control.

Simple vehicle and driver management

Effective access control

Clear analysis of fleet usage

Predictive maintenance

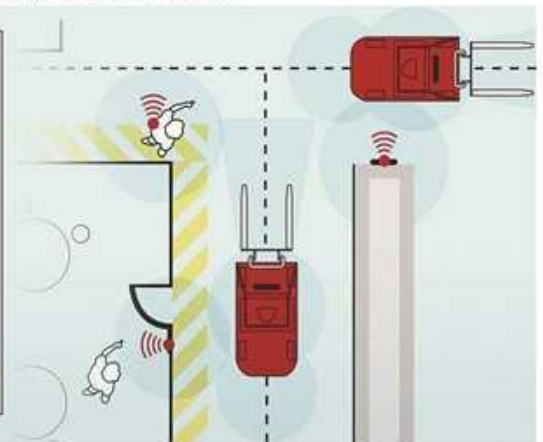

Visible reduction of violent damage

More safety in traffic on premises

LINDE ZONE CONTROL

The Linde Zone Control system assists all personnel involved in internal traffic. It can see around corners and through walls, providing automatic speed reductions, and can be programmed to suit any hazardous scenario.

ADVANTAGES AT A GLANCE	LINDE ZONE CONTROL	CAMERA	RADAR
PERSONNEL AND ZONE RECOGNITION	✓	✓	✗
WARNING ZONES THAT CAN BE CONFIGURED WITHIN 10 CENTIMETERS OF PRECISION	✓	✓	✓
VISUALIZATION OF THE NUMBER AND POSITION OF PERSONNEL IN THE DANGER ZONE	✓	✓	✗
MUTUAL WARNING FOR PEDESTRIAN PERSONNEL AND TRUCK OPERATORS	✓	✗	✗
DETECTION THROUGH WALLS AND RACKING	✓	✗	✗
VERSATILE, ADAPTABLE AND RAPID INSTALLATION	✓	✓	✓
